Brief description

With the **MTS** modular series terminal blocks for PCBs, wires up to **1.5 mm² (16 AWG)** can be used and consequently a current range of **17.5A certified** can be reached.

It is available in 3.5 mm (.138 in) and 7 mm (.275 in) metric pitches and in 3.81 mm (.100 in) and 7.62 mm (.300 in) Imperial pitches, in monolithic blocks from 2 to 25 poles, in both the side-stackable and modular versions, with insertion of the wire parallel to the PCB or inclined at 90°.

All the housings are modular, therefore it is possible to compose the monolithic terminal blocks **from 2 to 25 poles** separately, or to compose the basic terminal blocks until any number of poles is obtained. By taking advantage of this particular characteristic a minimum stock of basic terminal blocks can be kept.

It is simple to manage the product, the warehouse and the assembly with the **Kit packages** because several versions can be received with only one code, the part-numbers are significantly reduced and the risk of making mistakes is also reduced.

MTS with VDE pegs

The straight 2 pole MTS is also available with clamping pegs moulded in the plastic housing to secure it to the PCB.

With this solution the nominal tightening torque can be applied and the most restrictive guidelines set by the international standards (VDE) are passed.

Characteristics of components

- M2 nickel plated copper alloy screw.
- PA 6.6 polyamide housing.
